 - Take victim to an ophthalmologist
- After ingestion: Not applicable

5. Fire-Fighting Measures

- Suitable extinguishing media: Use an extinguishing agent suitable for the surrounding fire. Typically, apply dry chemical, dry sand, or special powder extinguishing (Class D) media. Do NOT use water, carbon dioxide or foam on molten metals. Water may be ineffective for extinguishing a fire but should be used to keep fire exposed billets, ingots and castings cool.
- Unsuitable extinguishing media: If molten: no water
- Special exposure hazards: On burning formation of metallic fumes (zinc oxide)

In molten state: violent to explosive reaction with water (moisture)

Instructions: Dilute toxic gases with water spray
 In case of metal bath fire: add metal blocks

When cooling/extinguishing: no water in the substance

Special protective equipment for fire-fighters: Gloves; Protective clothing

Heat/fire exposure: compressed air/oxygen apparatus

6. Accidental Release measures

- Personal precautions (PPE):
 - Respiratory protection from dust production: dust mask
 - Hand protection: gloves
 - Eye protection: safety eyewear
- Skin protection: protective clothing
- **Environmental precautions:** Within the present knowledge of the supplier, this product is not regarded as hazardous waste, as defined by EU Directive 91/689/EEC.
- Methods for cleaning up: If melted: allow liquid to solidify before taking it up
 - Pick up the material; wash clothing and equipment after handling

7. Handling and Storage

- Handling: Avoid raising dust; Observe strict hygiene; Keep away from naked flames/heat
 - On melting down: dry and preheat before use
 - Add only dry material to the metal bath
- Safe storage requirements:
 - Store in a dry area
 - Keep at temperature above dew point
 - Keep away from strong acids
